

# About The Conference

The International Conference on Smart and Sustainable Computing Systems (ICSSCS 2026) aims to bring together researchers, academicians, industry professionals and students to discuss emerging trends and innovations in smart technologies and sustainable digital systems. The conference focuses on cutting-edge advancements in Artificial Intelligence, Machine Learning, and Quantum Computing, 6G Communication, Cloud Computing and Green Technologies. ICSSCS 2026 provides a global platform to exchange research ideas, foster interdisciplinary collaboration and promote sustainable technological development.

## Available Tracks

- Artificial Intelligence
- Machine Learning
- Quantum Computing
- 6G
- Systems Cloud Computing
- Green and Sustainable Technologies
- Any Others...

## Conference Objectives

- To explore recent advances in smart computing technologies
- To promote research in sustainable and green digital systems
- To provide a platform for students and researchers to present their work
- To encourage academia–industry collaboration
- To discuss future-ready technologies including Quantum Computing and 6G Networks
